

## **Blue Moon Community Farm**

At Blue Moon we follow the practices of organic production as we transition our new land to certified organic. While we use tractors for tillage, bed preparation, and some weeding, the majority of our field work is done by hand. Employee work is focused on field production and harvesting, washing, and packing vegetables. All employees will be expected to work independently at times, oversee volunteers at times, and participate in record-keeping through planting, weeding, and harvest logs. According to interest, employees may also engage in livestock care, farmers market sales, CSA distribution, and restaurant deliveries.

Both full and part time employees will be considered for positions on the farm. Employees can start as early as April 1 and as late as May 1. Work season extends to December 1. Both start and end dates are negotiable. Summer-only employment is also a possibility.

Pay is based on experience, starting at \$8.00/hr. plus vegetables and meat. If interested, please submit a resume and 2 work-related references to:
